

Career Readiness: Future Ready PA

To support PA Districts in efforts to meet Future Ready requirements we have compiled a list of channels that support Career Readiness. **Complete a Key Word Search to find each.**

STEM Careers: Help your students visualize themselves working in the fields of science, technology, engineering, or math—perhaps as pilots, video game designers, skate park designers, or chemists.

Social Impact Programs: Explore real-world applications of STEM skills with lesson plans, interactive resources, videos and more, developed in partnership with leading corporate partners and organizations to connect students to the future of STEM innovation.

Tiger EDU: Explore: Explore is a robust program that supports students in college preparation and high-quality STEM career paths. Available at no cost, the standards-aligned resources of TGR EDU: Explore include newly digitized TGR Learning Labs' curriculum, interactive student experiences, online learning activities, educator training, meaningful family discussion starters and a virtual field trip exploring STEM careers at Facebook.

Cha-Ching Money Smart Kids: Discovery Education and Jackson Charitable Foundation are proud to present Cha-Ching Money Smart Kids! This partnership amplifies this engaging and fun financial literacy program, extending its impact to schools and homes across America. Join the Cha-Ching band as they prepare kids grades K-6 with the knowledge, tools, and practice they need to make informed decisions to reach their goals and dreams.

Manufacture Your Future: Arconic Foundation and Discovery Education have partnered to provide 3rd-12th grade educators, administrators, school counselors, and families with materials to cultivate the next generation of manufacturing leaders and innovators. New lesson plans and self-paced module are rooted in STEM principles, and counselor and family resources explore career options and provide a school-to-home connection.

Career and Workplace Skills: Explore a curation of the best resources in topics such as Media & Arts, Transportation and Material Moving Occupations, Marketing and Sales, Production Occupations and more!

BOARD

STEM Careers: Technical Writer

Learn about the career of a technical writer and take on a career-based challenge.

VIDEO SEGMENT

Writing a Personal Statement
